

Solar Rooftop Ground Mounted Systems

The **solar power solution** by **Enerzea**, a leading eco-friendly power generating Equipment Company inculcates the best technology and unique techniques to install rooftop or ground-mounted solar panels. By effectually utilizing the natural energy from the sun, Enerzea has optimally implemented the resources through effective PV technology to provide aesthetically and ergonomically designed solar rooftop ground mounted panels for residential and commercial purposes. Depending upon the usage and space constraint, they suggest the finest solution for installing panels either or on the rooftop or on the ground.

The **MNRE** (Ministry of New and Renewable energy) has implemented a programme to harness the solar energy to power homes, street lights, power plants etc. They have extended their support to the organization that has come forward to promote the use of the solar power. **Enerzea** is proud to announce that their solar power solution approved by **MNRE** under the scheme 'Off-Grid and Decentralized Solar Applications' of Jawaharlal Nehru National Solar Mission (JNNSM).

Enerzea with its innovative, cost-effective and eco-friendly power solution has effectually met the power requirements of various sectors.
