

## **The importance of Rockwool doors**

The construction sites, industrial areas, generators, and ventilators is definitely a nuisance as they emanate noise, dust, and heat which affects the peace and health of the people living in the neighborhood. In order to protect the employees and the people living in the surrounding from the noise and other kinds of pollution, **Isoflex**, a leading manufacturer of clean doors and hatches has come up with an optimum solution to rectify this issue. The [Rockwool doors](#) by **Isoflex** can effectually absorb noise and prevent dust and heat from penetrating into the enclosure. The **Rockwool doors** are made of a good quality material with two or three layers of steel sheets or aluminum with Rockwool stone wool sandwiched between them. The Rockwool stone wool is actually made from volcanic rocks which show great resistance to noise, fire, and heat.

## **Features and benefits of Rockwool doors**

The **Rockwool doors** have umpteen features that make it more popular. Some of them are:

- In some industrial sectors which equip boilers, dryers, ovens and gas turbines etc. generate a lot of heat, the **Rockwool doors** have the capacity to prevent the heat radiating into the atmosphere.
- The **Rockwool doors** contain non-combustible material which provides high insulation to fire. During fire-mishaps, the **Rockwool doors** not only protect from the fire but also avoid the heat from transferring into the work environment.
- The ventilators and generators emanate distressing noise, the **Rockwool doors** effectually absorb the noise from transferring into the outside environment thus providing a peaceful workplace to the employees.

**Isoflex**, being an ISO 9001:2008 certified company has always ensured to provide quality rich product and make sure that they do not give room to complaints. All their products undergo two or three stages of quality analysis before it is shipped to their clients. It is their constant effort to provide uncompromising quality service and products that have made them the best manufacturers in the producing clean room doors and door hatches.
