YASKAWA		

Our company was established in year **2005** with main agenda of provides electronic instruments and PCB repair and service to different industries through our technical skills and field experience. Since then we are providing high quality systematic repairing service in the field of industrial electronics instrumentation mainly in AC variable frequency drive.

- We provide all make repair at one place.
- We provide component level repair, so it makes always cost effective as compared to authorized repairing center or product replacement.
- We provide repair job work to newer as well as old technology control circuits. We provide Obsolete models repair service
- Timely Service: normally within 7 days of customer confirmation and in urgent cases within 3 days of customer confirmation
- Perfect repairing estimate before carry out job work. No deviation in charge after JOB completion.
- No evaluation charges. Though it involve labor as much as repairing job work. If customer doesn't want to repair, we return the JOB without charging anything.

- Easy tracking of your job work status. You can easily know your job work status through personalized contact number.

## **REPAIR ALL PRODUCT BRAND EUROPE & JAPAN**

### Repair Estimate: Evaluation of job work.

- The first and most important part of repair job work is to evaluate repair estimate of any instruments or control PCBs.
- we provide fast and perfect estimate before carry out any **JOB** work.
- We guarantee no deviation in estimate after completion of **JOB**.
- Value Addition: Though it involves equal labor to evaluate repairing estimate of any **JOB** as much as to carry out and complete the job work. We don't charge any estimate evaluation charge to clients even though client want unrepared **JOB** delivery

### Repair Time:

- **In normal case** we complete our job work within 7 days of receipt of client confirmation.
- **In urgent case** we can complete our job work within 4 days of receipt of confirmation with addition charge for higher priority
